

DENTIQ

Your Chairside 3D Printer

PREMIUM OWNERSHIP EXPERIENCE

Fully validated, turnkey solutions along with complete training and responsive support.

IMPROVED ACCURACY & CONSISTENCY

Highly precise, industrial-grade 3D printers, materials, and finishing kits.

SAME-DAY CHAIRSIDE DENTISTRY

Form and Function Geared towards Clinical Users.

PRODUCT FEATURES

Improved accuracy and consistency

The 47 micron pixel size of the print screen produces smoother surfaces and repeatable results with a wide range of selected materials. All calibrated resins have been painstakingly tested to save you time and ensure a superior fit and finish. The bottom line is a better mouth feel for your patients.

Premium ownership experience

There's a minimal learning curve with DENTIQ and you can launch into the print process in a matter of minutes. When things don't go according to plan, you can always refer to the extensive library of tutorials and user guides or reach out to Ackuretta Support online. Maintenance is a DIY-friendly affair and a global network of distributors are trained to provide local support.

Ergonomic design

DENTIQ is designed and built around you, the user, with a slew of subtle changes that make your workflow even smoother. The angled touchscreen allows for more comfortable operation while the swivel hood provides easy access and prevents resin contamination. The new leak-proof and locking vat frame keeps things in their place and the vat can now be put down onto flat surfaces.

Extensive range of pre-calibrated materials

More than 100 tested, approved, and certified 3D printing materials so that you can confidently print and produce repeatable results.

DENTIQ

Your Chairside 3D Printer

DENTIQ is a highly precise chairside 3D printer designed to provide a premium ownership experience for every type of user. Equipped with auto-calibration and 100+ precalibrated materials, DENTIQ offers a simpler learning curve for beginners while providing the same level of accuracy and consistency that professionals are looking for. Remote diagnostics for machine repair, easy component replacement, a built-in vat cleaning function, and a 2-year warranty makes owning DENTIQ the natural choice for chairside digital dentistry.

ACKURETTA ECOSYSTEM

Envision a future where dental clinics have a solution to 3D print end-product restorations chairside with lower cost, and higher efficiency. From hardware, software, finishing solutions, materials, to training resources and documentation, Ackuretta keeps everything in-house and up-to-date.

3D Printing Materials

A complete and versatile resin portfolio designed specifically for dental applications.

Finishing Kit

Transform your 3D prints into safe, ready-to-use dental applications.

Proprietary Software

Alpha 3D is the most intuitive, UX driven, dental-focused, 3D slicing software on the market today.

Alpha 3D

Other

All of this comes together to provide dental clinics and laboratories with a turnkey solution for digital dentistry.
